	Detailed Inventory
PWS Name: Naval Base Kitsap Bangor	
PWSID: WA5302714	
Date Last Updated:	10/15/2024

Purpose of this worksheet: To provide a customizable format water systems can use to track materials for each service line in their distribution system.

General Instructions: Each row in this worksheet represents one service line connecting the water main to the customer's plumbing. The worksheet includes required and recommended elements; the columns with the aqua shading are required by the LCRR. Systems can customize by adding or deleting columns. Important notes for each column are in Row 12; also see the Template Instructions worksheet for detailed instructions. Note that users can freeze panes to enable them to see the headings and notes when entering data. The worksheet includes examples in rows 13 - 20 and is formatted for approximately 10,000 entries.

A Unique ID is recommen ded for each service line.	Service Line Number is a specific designator for internal GIS location.	Water systems must track add their internal inventory. For the location identifiers are require requiring replacement. If the sys for their location identifier, othe coordinates, landmark, intersect specify service lin	publicly accessible version, ed for lead and galvanized stem does not use addresses er options could include GPS ion, block, or other details to	Dropdown list includes recommended subclassifications. If "Non- Lead Other", describe in Notes field	Select Yes, No, or Don't know. Important for determining if downstream/ customer-owned galvanized service line requires replacement	Date, year, or estimated date range when the service line was installed or replaced	Diameter in inches	Select option from drop down list. If "Other," describe in the Notes field	Select Yes or No	Can use this field for documenting additional relevant information, including when classification changes.	Dropdown list includes recommended subclassifications. If non- lead other, describe in Notes field.	Can use this field for documenting additional relevant information, including when classification changes.	Dropdown list includes four required service line classifications of Lead, Non-lead, Galvanized Requiring Replacement, or Unknown
