

Naval Air Station Whidbey Island
Lead Service Line Inventory

Detailed Inventory

PWS Name: Naval Air Station Whidbey Island Ault Field and Seaplane Base	
PWSID: WA5303420	
Date Last Updated:	10/15/2024

Purpose of this worksheet: To provide a customizable format water systems can use to track materials for each service line in their distribution system.

General Instructions: Each row in this worksheet represents one service line connecting the water main to the customer's plumbing. The worksheet includes required and recommended elements; the columns with the aqua shading are required by the LCRR. Systems can customize by adding or deleting columns. Important notes for each column are in Row 12; also see the **Template Instructions** worksheet for detailed instructions. Note that users can freeze panes to enable them to see the headings and notes when entering data. The worksheet includes examples in rows 13 - 20 and is formatted for approximately 10,000 entries.

Location Information				System-Owned Portion						Customer-Owned Portion		Entire Service Line Material Classification	
Unique Service Line ID	Service Line Number	Location Identifier		System-Owned Portion Service Line Material Classification	If Non-Lead in Column G, Was Material Ever Previously Lead?	Service Line Installation Date	Service Line Size	Basis of Material Classification	Was the Service Line Material Field Verified?	Notes	Customer-Owned Portion Service Line Material Classification		Notes
		Street Address	Other Location Identifier										
<i>A Unique ID is recommended for each service line.</i>	<i>Service Line Number is a specific designator for internal GIS location.</i>	<i>Water systems must track addresses of all service lines in their internal inventory. For the publicly accessible version, location identifiers are required for lead and galvanized requiring replacement. If the system does not use addresses for their location identifier, other options could include GPS coordinates, landmark, intersection, block, or other details to specify service line locations.</i>		<i>Dropdown list includes recommended subclassifications. If "Non-Lead Other", describe in Notes field</i>	<i>Select Yes, No, or Don't know. Important for determining if downstream/customer-owned galvanized service line requires replacement</i>	<i>Date, year, or estimated date range when the service line was installed or replaced</i>	<i>Diameter in inches</i>	<i>Select option from drop down list. If "Other," describe in the Notes field</i>	<i>Select Yes or No</i>	<i>Can use this field for documenting additional relevant information, including when classification changes.</i>	<i>Dropdown list includes recommended subclassifications. If non-lead other, describe in Notes field.</i>	<i>Can use this field for documenting additional relevant information, including when classification changes.</i>	<i>Dropdown list includes four required service line classifications of Lead, Non-lead, Galvanized Requiring Replacement, or Unknown</i>
